

COMPANY POLICY FOR QUALITY, ENVIRONMENTAL PROTECTION AND THE SUSTAINABLE USE OF ENERGY

Cerdomus Srl considers the quality of its processes and products, environmental protection and the rational and efficient use of energy to be of fundamental importance. For this reason, it has defined and maintains the following Company Policy:

- **Pursue the continuous improvement of customer satisfaction** through quality, reliability and innovation of the products and services offered.
- **Safeguarding the integrity of the environment**, continuously improving its environmental performance through the reduction of impacts, the monitoring of emissions and the optimization of processes.
- **Promote the efficient use of energy**, reducing energy consumption and inefficiencies through continuous monitoring, analysis of energy data, research of less impactful energy sources and the adoption of more efficient technologies.
- **To ensure compliance with the applicable regulations** on product quality, environment, energy and safety at work, ensuring systematic control of processes and compliance with mandatory and voluntary requirements.
- **Support the design and purchase of energy-efficient products, equipment and services**, with the aim of improving the overall energy performance of the organization over time.
- **Build and maintain the motivation, competence and awareness of staff**, promoting active involvement in quality, environment, energy and safety, so that each employee contributes to the achievement of company objectives.
- **Encourage dialogue with customers, suppliers, local communities and stakeholders**, sharing values, information and results and acknowledging their needs and expectations, also with reference to energy sustainability.
- **Increasing the quality level and efficiency of business processes**, improving infrastructures, equipment and systems also with a view to reducing energy consumption and environmental impacts.

To achieve these objectives, Cerdomus is committed to the implementation, maintenance and continuous improvement of an Integrated Management System for Quality, Environment and Energy, compliant with the UNI EN ISO 9001, 14001 and 50001 standards.

To maintain and improve the results achieved, Cerdomus invites the collaboration of staff at all levels: ensuring the quality of its products, maintaining the trust of all stakeholders, guaranteeing environmental protection and the responsible use of energy must constitute a commitment and a moral responsibility.

Everyone, within the scope of their duties and skills, must consider product quality, environmental sustainability and energy efficiency as issues of primary importance and integral parts of their work activity, and is therefore called upon to provide ideas for improvement relating to their area of activity.
